A brief history

From modest beginnings in 1979 when the business was founded, the company traded as K-Pumps until incorporation in October 2002.

Today a management team, headed by Peter Worden as Managing Director, supervises the activities of a specialised and dedicated team.

The brewing industry has increasingly identified the considerable benefits and cost savings associated with quality refurbished equipment, resulting in the significant growth that the company continues to enjoy year on year.

We have now expanded our business further into the cellar and soft drinks dispense equipment and bar equipment repair services. We now repair bottle fridges, cabinets, carbonators, soft drinks dispenser's and fob detectors.

Enviromental Concerns

Environmental concerns relating to pumps and coolers are at the very heart of K-Cooler's activities, as recycling and refurbishment are two of the company's foundation stones.
