Bottle Chillers and Fridges

Any current type of Bottle chillers and fridges can be refurbished to individual client requirements.

The broad procedure for both Chillers and fridges cabinets follows a similar multi-stage process. Firstly, all units are assessed to determine whether or not they can be refurbished and the clients are notified of any equipment that is beyond repair and are to be included in our scrap disposal programme

Units are then stripped and cleaned prior to the technicians carrying out a series of diagnostic checks before carrying out refurbishment to the agreed specification.

Before despatch all units are subject to a full functionality test, electrical test, and quality inspection, the resulting data is stored electronically for a period a fifteen months

Any Model - Any Brand

At Kcoolers we have no limitation to what we repair and remanufacture. We will work on any model or brand in the industry. Chillers and bottle fridge repair is a fundamental service we offer to ensure licensee's can maintain service and throughput of sales.
