Pumps

Pumps for the Brewing and Soft Drinks Industry

Top pumps, base pumps and dispense pumps from leading manufactures that include Totton and March May can be refurbished.

K-Cooler's vast experience of these leading manufacturers' products, as well as many other pumps used in the brewing industry, means that equipment that would otherwise have to be replaced can often be re-used.

The pumps are stripped and cleaned which also gives technicians the opportunity to examine them in detail. All the pump parts are cleaned before being refurbishing. All bearings, seals, gland seals and o-rings are replaced with new parts as standard procedure.

Top and base pumps are electrically tested and inspected prior to packing - in addition dispense pumps are subjected to a flow rate and pressure test procedure. Data relating to the pump refurbishment process is electronically stored for twelve months.

Go with the Flow !

When it comes to "Pumps" the kpumps team offer an excellent pump repair service. We recondition any pump on the market. We pressure test all pumps, check every seal, replace every bearing, check every nut and clean and recondition every part. The pumps are boxed and arrive to you in a Factory New Condition ready for installation.

We repair and recondition pumps for some of the biggest breweries in europe.
